17. **Our operations are considerably located in Madhya Pradesh failure to expand our operations may restrict our growth and adversely affect our business.**

Currently, we are carrying our business mainly in the Indore, in the state of Madhya Pradesh and hence our major revenues are generated from operations in these regions only. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues, our operating results and financial conditions of the Company.

18. **Material changes in the regulations that govern us could cause our business to suffer and the price of our Equity Shares to decline.**

Our revenues are dependent on various factors such as future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements. Our ability to pay dividends is also restricted under certain financing arrangements that we expect to enter into.

The combination of these factors may result in significant variations in our revenues and profits and thereby may impact our ability to pay dividends. Therefore, we believe that period-to-period comparisons of our results and operations are not necessarily meaningful and should not be relied upon as indicative of our future performance. In the future our results of operations may be below market expectations; the price of our Equity Shares may decline.

External Risk Factors

20. **Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.**

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude.

21. **Global recession and market conditions could cause our business to suffer.**

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of recovering from recession which is affecting the economic condition and markets of not only these economies but also the economies of the emerging markets like Brazil, Russia, India and China. General business and consumer sentiment has been adversely affected due to the global slowdown and there cannot be assurance, whether these developed economies will see good economic growth in the near future.

22. **Natural calamities and changing weather conditions caused as a result of global warming could have a negative impact on the Indian economy and consequently impact our business and profitability.**

Natural calamities such as draughts, floods, and earthquakes could have a negative impact on the

Indian economy and may cause suspension, delays or damage to our current projects and operations, which may adversely impact our business and our operating results. India's being a monsoon driven economy, climate change caused due to global warming bringing deficient / untimely monsoons could impact Government policy which in turn would adversely affect our business.

23. **Tax rates applicable to Our Company may increase and may have an adverse impact on our business.**

Any increase in the tax rates including surcharge and education cess applicable to us may have an adverse impact on our business and results of operations and we can provide no assurance as to the extent of the impact of such changes.

24. **Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.**

The Government of India has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms. However, there can be no assurance that such policies will be continued in the future. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and adversely affect our business, financial condition and results of operations.

25. **Civil unrest, acts of violence including terrorism or war involving India and other countries could materially and adversely affect the financial markets and our business.**

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

26. **The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.**

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed NNM Securities Private Limited as Designated Market Maker for the equity shares of our company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the chapter titled "General Information" beginning on page 26 of this Prospectus.

INTRODUCTION

SUMMARY OF OUR INDUSTRY

Overview of the Indian Education System

With a view to encourage skill development, due focus is being given on 'Vocational Education' so as to enhance individual employability, reduce the mismatch between demand and supply of skilled manpower and provides an alternative for those pursuing higher education. In this direction, Centrally Sponsored scheme of "Vocationalisation of Secondary and Higher Secondary Education" is being implemented the scheme has been aligned with the National Skill Qualification Frame work.

(Source: http://mhrd.gov.in/sites/upload_files/mhrd/files/document-reports/AR2013-14.pdf)

In order to promote Adult Education & Skill Development through the voluntary sector, a modified scheme, namely, Scheme of Support to Voluntary Agencies for Adult Education and Skill Development, is being implemented. The main objective of the Scheme is to secure extensive as well as intensive involvement of the voluntary sector in the endeavour of the Government to promote functional literacy, skill development and continuing education among adults, under the overall umbrella of Saakshar Bharat.

National Vocational Education Qualification Framework (NVEQF)

Qualifications are made up of occupational standards for specific areas of learning units. This would provide the stakeholders such as the learners, education and skill training providers and employers to gain information about the broad equivalence of qualifications across specific skill sectors. It is, therefore, a nationally integrated education and competency based skill framework that will provide for multiple pathways both within vocational education and between general and vocational education to link one level of learning to another higher level and enable learners to progress to higher levels from any starting point in the education and/or skill system. The key elements of the NVEQF are to provide –

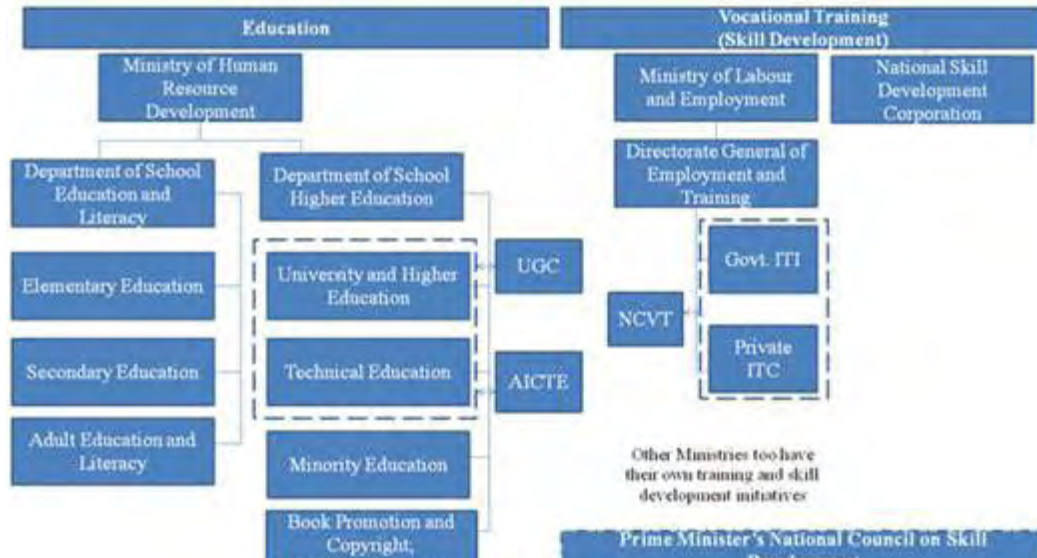

- (a) national principles for providing Vocational Education (VE) leading to international equivalency,
- (b) multiple entry and exit between VE, general education and job markets,
- (c) progression within VE,
- (d) transfer between VE and general education, and
- (e) partnership with industry/employers

The National Vocational Education Qualifications Framework (NVEQF) would be assimilated into the National Skills Qualification Framework, once that framework is notified for the country.

Current Structure and Supply of Education and Skill Development system in India:

The following is the structure of the Education and Skill Development system in India.

As skill development in a large scale takes off, implementing agencies (government, institutes – both government and private, vocational training providers, and other such implementers) would be faced with challenges that come up at every segment of the ‘skill development value chain’. In other words, these are challenges that each skill development center or groups of such centers are likely to face.

Skill Development Value Chain

It is required to not only skill and educate the workforce at the higher skill levels (which is key to ensuring industry competitiveness through research and IP, etc.), but also to adequately skill the workforce at the lower levels (i.e., where much of the workforce is concentrated).

Need for Vocational Training

Vocational Education and Training (VET) is an important element of the nation’s education initiative. In order for Vocational Education to play its part effectively in the changing national context and for India to enjoy the fruits of the demographic dividend, there is an urgent need to redefine the critical elements of imparting vocational education and training to make them flexible, contemporary, relevant, inclusive and creative. The Government is well aware of the important role of Vocational education and has already taken a number of important initiatives in this area.

Overview of the Indian Education System

With a view to encourage skill development, due focus is being given on 'Vocational Education' so as to enhance individual employability, reduce the mismatch between demand and supply of skilled manpower and provides an alternative for those pursuing higher education. In this direction, Centrally Sponsored scheme of "Vocationalisation of Secondary and Higher Secondary Education" is being implemented the scheme has been aligned with the National Skill Qualification frame work.

(Source: http://mhrd.gov.in/sites/upload_files/mhrd/files/document-reports/AR2013-14.pdf)

In order to promote Adult Education & Skill Development through the voluntary sector, a modified scheme, namely, Scheme of Support to Voluntary Agencies for Adult Education and Skill Development, is being implemented. The main objective of the Scheme is to secure extensive as well as intensive involvement of the voluntary sector in the endeavour of the Government to promote functional literacy, skill development and continuing education among adults, under the overall umbrella of Saakshar Bharat.

National Vocational Education Qualification Framework (NVEQF)

Qualifications are made up of occupational standards for specific areas of learning units. This would provide the stakeholders such as the learners, education and skill training providers and employers to gain information about the broad equivalence of qualifications across specific skill sectors. It is, therefore, a nationally integrated education and competency based skill framework that will provide for multiple pathways both within vocational education and between general and vocational education to link one level of learning to another higher level and enable learners to progress to higher levels from any starting point in the education and/or skill system. The key elements of the NVEQF are to provide –

- (a) national principles for providing Vocational Education (VE) leading to international equivalency,
- (b) multiple entry and exit between VE, general education and job markets,
- (c) progression within VE,
- (d) transfer between VE and general education, and
- (e) partnership with industry/employers

The National Vocational Education Qualifications Framework (NVEQF) would be assimilated into the National Skills Qualification Framework, once that framework is notified for the country.

Today, the world and India need a skilled workforce. If we have to promote the development of our country then our mission has to be 'skill development' and 'Skilled India'. Millions and Millions of Indian youth should acquire the skills which could contribute towards making India a modern country.

Our country presently faces a dual challenge of severe paucity of highly-trained, quality labor, as well as non-employability of large sections of the educated workforce that possess little or no job skills. Ministry for Skill Development and Entrepreneurship (earlier Department of Skill Development and Entrepreneurship created in July 2014) has been set up in November 2014 to give fresh impetus to the Skill India agenda and impart employable skills to its growing workforce over the next few decades. Apart from meeting its own demand, India has the potential to provide skilled workforce to fill the expected shortfall in the ageing developed world.

As India moves progressively towards becoming a global knowledge economy, it must meet the rising aspirations of its youth. This can be partially achieved through focus on advancement of skills that are relevant to the emerging economic environment. The challenge pertains not only to a huge quantitative expansion of the facilities for skill training, but also to the much more important task of raising their quality.

Skill development, however, cannot be viewed in isolation. Skills are fundamental to, but not sufficient for, gaining decent jobs. Improved productivity through skill development must be complemented by economic growth and employment opportunities. Skills need to be an integral part of employment and economic growth strategies. Coordination with other national macroeconomic policies and strategies is therefore critical.

National Skill Development and Entrepreneurship policy of 2015 supersedes the policy of 2009. The objective of this policy is to meet the challenge of skilling at scale with speed, standard (quality) and sustainability. It aims to provide an umbrella framework to all skilling activities being carried out within the country, to align them to common standards and link skilling with demand centers. In addition to laying down the objectives and expected outcomes, the policy also identifies the various institutional frameworks which will be the vehicles to reach the expected outcomes. Skills development is the shared responsibility of government, employers and individual workers, with NGOs, community based organizations, private training organizations and other stakeholders playing a critical role. The policy links skills development to improved employability and productivity to pave the way forward for inclusive growth in the country. The skill strategy is complemented by specific efforts to promote Entrepreneurship to create enough opportunities for skilled workforce.

Skills and knowledge are the driving forces of economic growth and social development for any country. Countries with higher levels and better standards of skills adjust more effectively to the challenges and opportunities in the domestic and international job market.

The country, however, has a big challenge ahead as it is estimated that only 2.3% of the total workforce in India has undergone formal skill training as compared to 68% in UK, 75% in Germany, 52% in USA, 80% in Japan and 96% in South Korea. While the debate on the exact quantum of the challenge continues, there is no disputing the fact that the range is of massive proportions.

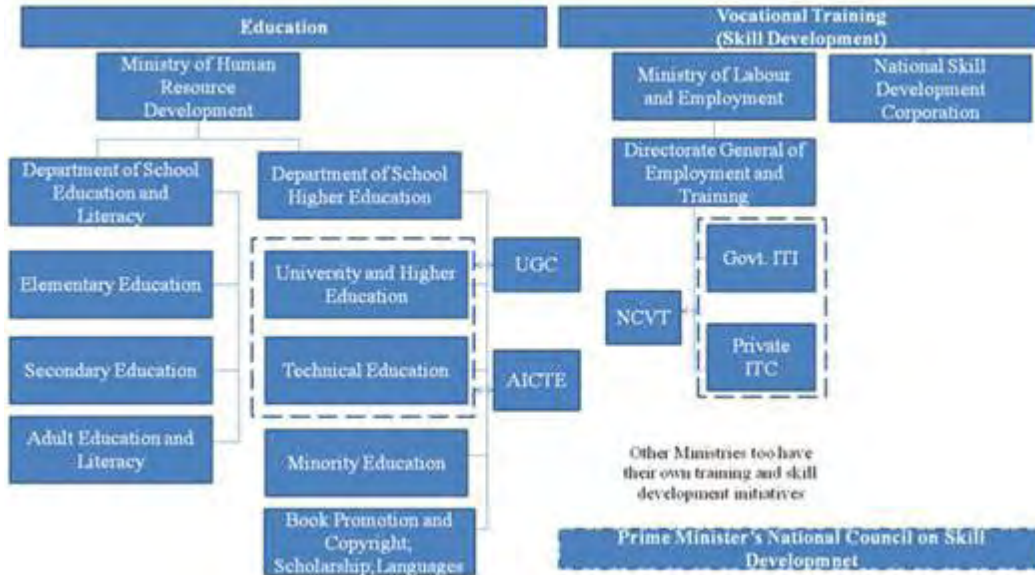

On demand side, a skill gap study has been conducted by National Skill development Cooperation in 2014, which indicates that there is an additional net requirement of 11.92 crore skilled manpower in twenty four key sectors by 2022.

Current annual skilling capacity, including training for the farm sector, in India is estimated at 7 million. This capacity needs to Scale-up with Speed and Standards combined with more job opportunities both nationally and globally. Thus, appropriate infrastructure needs to be created keeping in view the sectoral and geographical demands.

The availability of good quality trainers is a major area of concern. There is a lack of focus on development of trainers with a clear livelihood path which can make this an aspirational career choice and can ensure regular adequate supply of good quality trainers in every sector.

Current Structure and Supply of Education and Skill Development system in India:

The following is the structure of the Education and Skill Development system in India.

As skill development in a large scale takes off, implementing agencies (government, institutes – both government and private, vocational training providers, and other such implementers) would be faced with challenges that come up at every segment of the 'skill development value chain'. In other words, these are challenges that each skill development center or groups of such centers are likely to face.

Skill Development Value Chain

It is required to not only skill and educate the workforce at the higher skill levels (which is key to ensuring industry competitiveness through research and IP, etc.), but also to adequately skill the workforce at the lower levels (i.e., where much of the workforce is concentrated).

Need for Vocational Training

Vocational Education and Training (VET) is an important element of the nation's education initiative. In order for Vocational Education to play its part effectively in the changing national context and for India to enjoy the fruits of the demographic dividend, there is an urgent need to redefine the critical elements of imparting vocational education and training to make them flexible, contemporary, relevant, inclusive and creative. The Government is well aware of the important role of Vocational education and has already taken a number of important initiatives in this area.

(Source: http://mhrd.gov.in/sites/upload_files/mhrd/files/document-reports/AR2013-14.pdf)

Need of Vocational Education

Vocational, or skills-based, education is becoming more and more important today, with many employers expecting new employees to have all the practical skills they need to start work and also for those who have to support their families immediately after senior secondary education. Vocational courses are typically more practical and skills-based than academic degrees, but they are often taught at universities as well as colleges and technical institutes. Vocational Education and Training (VET) is an important element of the nation's education initiative.

Vocational education has to be viewed from different multi-layered practices. One is of course the hands on training component. The other is employment generation and sustainability.

In today's technical world, even an engineering graduate is supposed to have some technical skills apart from the degree possessed by him or her i.e. in the form of certification etc.

Government Role

In order for Vocational Education to play its part effectively in the changing national context and for India to enjoy the fruits of the technical fields, there is an urgent need to redefine the critical elements of imparting vocational education and training to make them flexible, contemporary, relevant, inclusive and creative. The Government is well aware of the important role of Vocational education and has already taken a number of important initiatives in this area

(Source: http://www.ripublication.com/ijeisv1n1/ijeisv4n1_12.pdf)

The need and importance of vocational education can be assessed, and is further high-lighted, by having a look at its various uses and advantages:

- (1) Vocational education aims at reducing unemployment among the educated youth and thus help solving the giant problem of unemployment;
- (2) It will entail many economic benefits. It means increased productivity which brings economic prosperity to the people and to the country at large;
- (3) It suits individual aptitudes, and so, ensures better results;
- (4) It instills among the youth a sense of security and usefulness, which goes a long way to make them better citizens.

Capacity

The annual skilling capacity in the country was estimated at about 7 million in 2014. In the current landscape, capacity is being created by private sector training organisations, industry in-house training, government and private ITIs, tool rooms and in schools, colleges and polytechnics. For all existing and new capacity that will be generated, the focus will move from inputs to outcomes of skill training that include employability and placements of trainees. For Government supported schemes, funding will be linked to outcomes of the training programmes.

The Government will support the creation and use of infrastructure in both public and private domain through appropriate equity, grant and loan support.

A framework for accreditation of Training Providers in both the public and private domain will be notified based on training capabilities, infrastructure, availability of trainers, tie up with industry etc. This will facilitate accreditation at multiple levels and for multiplicity of courses. The accreditation which will be revised periodically will help students to make informed choices about the TPs.

The human resource requirements of the country will be addressed by aligning the supply and composition of skilled workers with the demand. Training providers will be incentivized and Government schemes designed to enable the workforce to benefit from the requirements of the industry and the country's strategic priorities including flagship programmes. This will ensure that the supply of skilled workforce are relevant to the needs and can be easily absorbed into the job market.

Private Sector initiatives in skilling will be encouraged and would be entrusted to National Skill Development Corporation (NSDC) to create skilling capacity in the country. For this purpose, NSDC would continue to catalyze the creation of market-based, scalable business by providing patient funding through a combination of debt, equity and grants to Private sector to build capacity. This capacity would be created on self-sustainable model through Private Training Partners to cater to skilling needs of educational dropouts in rural and urban landscape to bring them back to sustainable livelihood options.

The Ministry of Skill Development and Entrepreneurship, which has been set up to coordinate skill development efforts in the country.

Industry needs to be closely involved in providing job opportunities to the skilled workforce. Industry will be encouraged to increasingly move towards employing only certified skilled people. In addition, employers need to rationalize the compensation paid across different levels of skills to award a skill premium for increased productivity as a result of higher skills.

Placement of Students:

The completion of Course is not sufficient, until and unless students are given employment. The company has made arrangement with Industrial and Business organizations for placement of students who are declared successful. The company has successfully placed all of its students. The feedback of students is very encouraging and it is helping company to get the business and fulfill its corporate social responsibility.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

India's current Foreign Direct Investment ("FDI") Policy issued by the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, GOI ("DIPP") by Circular 1 of 2014, with effect from April 17, 2014 ("Circular 1 of 2014"), consolidates and subsumes all previous press notes, press releases and clarifications on FDI issued by the DIPP. The Government usually updates the consolidated circular on FDI Policy once every Year and therefore, Circular 1 of 2014 will be valid until the DIPP issues an updated circular.

FII's are permitted to subscribe to shares of an Indian company in a public offer without the prior approval of the RBI, so long as the price of the equity shares to be issued is not less than the price at which the equity shares are issued to residents.

RBI has also issued Master Circular on Foreign Investment in India dated July 01, 2014 which is valid till June 30, 2015. In terms of the Master Circular, an Indian company may issue fresh shares to person's resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Foreign investment limit is allowed up to 100 per cent under automatic route in our Company, subject to appropriate approvals of the shareholders in general meeting. Currently, the foreign investment in our Company is limited to 24 per cent of the paid up equity share capital of our Company as we have not obtained the approvals of shareholders for a higher limit.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI. Further, in terms of the Consolidated FDI Policy, prior approval of the RBI shall not be required for transfer of shares between an Indian resident and person not resident in India if conditions specified in the Consolidated FDI Policy have been met. The transfer of shares of an Indian company by a person resident outside India to an Indian resident, where pricing guidelines specified by RBI under the foreign exchange regulations in India are not met, will not require approval of the RBI, provided that (i) the original and resultant investment is in line with Consolidated FDI policy and applicable foreign exchange regulations pertaining to inter alia sectoral caps and reporting requirements; (ii) the pricing is in compliance with applicable regulations or guidelines issued by SEBI.
