2. *Some of the properties occupied by us including our Registered Office are not owned by us. If we are required to vacate the same, due to any reason whatsoever, it may adversely affect our business operations.*

Our Company has its retail stores at the premises that are not owned by the Company. Our Company has been occupying such premises under business conducting agreements from several third parties at a payment of monthly rent. Although, we believe that we have complied with all the terms of such agreements, in the event there is any breach or violation of the same, we may be required to vacate the same. Further, in any event, on expiry of such agreements, if the respective owners are not willing to renew the same, the aforesaid properties may have to be vacated and we may be required to look for alternate premises, which we may not be able to find at terms favourable to our Company. In such an event, it will adversely affect our business operations and our financial condition.

Further, our Corporate Office belongs to our Promoters Mr. Gilbert Baptist and Mrs. Marceline Baptist. They have permitted the Company to utilise the said premises vide its no-objection certificate dated August 01, 2015. For further details please see the heading 'Property' in the section titled "Our Business" on page no. 92 of this Draft Prospectus.

3. *We have limited ability to protect our intellectual property and may be subject to third party claims and if we are unable to protect such intellectual property, our business could be adversely affected.*

Our intellectual property rights such as trademarks, designs and copyrights are important to our success and for generating and maintaining brand recognition is a significant element of the business strategy of the Company. We may be subject to legal proceedings and claims in the ordinary course of business, including claims of alleged infringement of the trademarks and other intellectual property rights of third parties. In

addition, litigation may be necessary in the future to enforce our intellectual property rights, protect trade secrets or to determine the validity and scope of proprietary rights claimed by others. Any litigation of this nature, regardless of outcome or merit, could result in substantial costs and diversion of management and technical resources, any of which could adversely affect our business, financial condition and results of operations.

We have registered various trademarks and designs across various classes and have also filed certain applications for registration of trademarks and patents in India. Two of the trademarks applied by us with the Trademark Registry have been objected by third parties, including, the trademark for our brandname “MALAIKA”. For further details regarding applications pending with appropriate authorities, please refer to the section titled “Government and Other Approvals” on page 170. There is no assurance that these applications shall result in us being granted registration in a timely manner or at all or that third parties would not infringe upon our intellectual property or any order restraining or prohibiting us from using the trademark, shall adversely affect the business prospects, reputation and goodwill of the Company. In such a case protection of the trademark in India may be difficult and we may be a party to litigation for infringement. In addition, the Company may not be able to detect any unauthorized use or take appropriate and timely steps to protect our intellectual property rights. Our inability to protect the same could adversely affect our business.

4. *Certain statutory filings made by our Company have been misplaced*

Certain statutory forms required to be filed with RoC have been misplaced by us and we do not have substantial records evidencing the filings made. We may be called upon to re-file the said forms with penalty which will result in incurring considerable amount of expenditure.

5. *Our success depends largely upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain key managerial personnel may adversely affect the operations of our Company.*

Our Company and our Promoters have over the years built relations with customers and public at large. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our customers. Accordingly, our Company’s performance is dependent upon the services of our Promoters and other Key Managerial Personnel. Our future performance will, therefore, depend upon the continued services of these persons. It is possible that we may lose our skilled and trained staff to our competitors and high attrition rates in particular, could result in a loss of domain and process knowledge. Demand for key managerial personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

6. *If we are not able to obtain, renew or maintain our statutory and regulatory registrations and approvals required to operate our business, it may have a material adverse effect on our business.*

We require certain statutory and regulatory registrations and approvals to operate our business. While, we believe we have procured all the necessary licenses/registrations/approvals, there cannot be any assurance that the same are adequate for legal compliance or that we have complied all the applicable laws. In the future, we will be required to renew such registrations and approvals and obtain new registrations and approvals for any proposed operations, including any expansion of existing operations. While we believe that we will be able to renew or obtain such registrations and approvals as and when required, there can be no assurance that the relevant authorities will renew or issue any such registrations or approvals in the time-frame anticipated by us or at all. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations.

Further, our Company has not obtained certain consents and approvals for certain units and some of the approvals have not been issued in the name of our Company. If we are unable to procure the same in future, heavy penalties may be imposed on our Company and it may also result in the interruption of our operations.

7. *The business and future results of operations of our company may be adversely affected if we incur any time or cost overruns.*

Our Company's business plans are subject to various risks including time and cost overruns and delays in obtaining regulatory approvals. There can be changes in the economic environment, local real estate market, prospective customer's perception, price escalation, etc. If the changes take Place during the duration of the business, then our projections regarding the costs, revenues, return on the business, profitability as well as our operations will be adversely affected. There could also be unexpected delays and cost overrun in relation to our projected / future projects and thus, no assurance can be given to complete them on scheduled time and within the expected budget.

8. *We have entered into transactions with related parties which may create conflicts of interest for certain of our Management and Directors.*

We have entered into transactions with related parties, including our Promoter and its affiliated companies. Such agreements may give rise to current or potential conflicts of interest with respect to dealings between us and such related parties. Additionally, there can be no assurance that any dispute that may arise between us and related parties will be resolved in our favor.

9. *We may not be able to sustain effective implementation of our business and growth strategy.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Whilst we have generally been successful in execution of our business strategy in the past, there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

10. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

11. *The balance confirmation from Malaika Credit Cooperative society is not given.*

12. *A significant change in the central and state governments' economic liberalization and deregulation policies could disrupt our business. A change in taxation laws could also adversely impact our financial condition and results of operation*

Our performance and growth are dependent on the health of the Indian economy and more generally the global economy. The economy could be adversely affected by various factors such as political or regulatory

action, including adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any change in the Government's policies in the future could adversely affect business and economic conditions in India and could also adversely affect our business prospects, financial condition and results of operations. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally and specifically have an adverse effect on our operations.

13. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters and Promoter Group will collectively own substantial portion of our Equity Share Capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that may not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

14. Demand for our products is affected by global and national economic conditions. Any development which decelerates the demand for our products would have an adverse impact on the Company.

The electronic industry in India in general and our business and results of operations in particular are affected by the change in various global and national economic conditions. Changes or a downturn in the global or national economy could add uncertainty to currency inflation or deflation, interest rates, taxation, stock market performance, consumers' confidence and consumers' perception of economic conditions, which in turn may affect the consumers' willingness to purchase our products. Our business is sensitive to a number of factors that influence the levels of consumer spending, including political and economic conditions such as recessionary environments, the levels of disposable consumer income, consumer debt, interest rates. Declines in consumer spending on electronics or home products could have an adverse effect on our operating results. Purchases by consumer of our products generally decline during recessionary periods and other periods in which disposable income is adversely affected. While adverse economic and business conditions are harmful to all companies, companies such as ours are particularly sensitive to them, particularly declining levels of disposable consumer income, higher consumer debt, higher interest rates, higher taxation, and increase in unemployment because of their direct impact on discretionary consumer spending. Unfavorable changes in business and economic conditions affecting our consumers could result in decrease in demand for our products or lower our profit margins, and have a material adverse effect on our financial condition and results of operations.

15. We face significant competition in the electronic industry. Any failure to compete effectively may have a material adverse effect on our business and operations.

The electronic industry in India is highly competitive with several other domestic and foreign brands present in the market and we expect that competition will continue to increase with entry of new companies (both domestic and international) in this industry, and also with advent new technologies. In such a competitive

environment, our brand may face considerable pressure to sustain customer loyalty, satisfaction, and requirement and brand equity. With number of domestic and international brands entering Indian electronic industry, the industry is witnessing substantial change in dynamics. Many of our competitors have access to considerable financial and technological resources with which they are able to compete aggressively, including by funding future growth and expansion and improving on the product quality and in acquisitions. We face a variety of competitive challenges including:

- Anticipating and quickly responding to changing consumer demands and preferences;
- Maintaining favourable brand recognition;
- Developing innovative, high-quality products that appeal to consumers
- Pricing our products effectively and achieving customer perception of value;
- Providing strong and effective marketing support;
- Providing prompt after sales services;

Our competitors may expend financial and other resources to improve their market share to compete more aggressively. With increase in competition, we may *inter alia* witness lower demand for our products, pressure on pricing, loss in market share, which may impact our business and results of operations. Our inability to withstand competitive pressures and respond to changing business dynamics may have a material adverse effect on our business prospects, financial condition and results of operations.

16. *Our insurance coverage may not adequately protect us against certain operational hazards and this may have a material adverse effect on our business.*

Our businesses involves many risks and hazards, including the breakdown, failure or substandard performance of equipment, delay in delivery of equipment or improper installation or operation of equipment, difficulties in upgrading or expanding existing facilities, labour disturbances, fire, natural disasters such as earthquakes, adverse weather conditions or flooding, environmental hazards and industrial accidents. In addition, the insurance coverage for our facilities is subject to periodic renewal. Numerous factors outside our control can affect market conditions, which in turn can affect the availability of insurance coverage as well as premium levels for policies. The insurance coverage is generally also subject to certain exclusions, limitations and deductibles. If the availability of insurance coverage is reduced significantly, we may become exposed to certain risks for which we are not or could not be insured. Also, if premiums for the insurance coverage required for these facilities increase significantly, we could incur substantially higher costs for such coverage or may decide to reduce the coverage amounts, either of which could have an adverse effect on their financial condition and results of operations. We maintain insurance which we believe is typical in our industry and in amounts that we believe to be commercially appropriate. Such insurance, however, may not provide adequate coverage in certain circumstances. We do not carry business interruption insurance with respect to our operations. The occurrence of a significant event for which we are not adequately insured against could materially adversely affect our operations and financial condition. In addition, in the future, some or all of our insurance coverage may become unavailable or may not be available on commercially reasonable terms.

17. *Our business in relation to sale of certain electronic products is seasonal in nature. Any substantial decrease in our sales during this period can have a material adverse effect on our financial performance.*

The sale of our certain electronic products is seasonal in nature. This unevenness in seasonal sales is largely due to the buying cycles of the customers and weather cycles of locations to which we cater. The sale of few of our products like TV, air conditioners, etc. is higher during a particular season and festival time. We expect that this trend of buying and weather cycles will continue to have an effect on our business and results of operations. Any disturbances/disruptions in production during this period may lead to reduction in sales and have an impact on the financial performance of the Company.

- 18. *Our indebtedness and the restrictive covenants imposed upon us in certain debt facilities could restrict our ability to conduct our business and grow our operations, which would adversely affect our financial condition and results of operations.***

As of March 31, 2015, on standalone basis, our secured borrowings were Rs. 4,845.47 Lakhs. The agreements governing our existing indebtedness contain restrictions and limitations, such as restriction on, utilization of facility solely for the purpose sanctioned, incurring further indebtedness, creating further encumbrances on our assets, effecting any scheme of amalgamation or restructuring and undertaking guarantee obligations. In addition, some of these borrowings may contain financial covenants, which require us to maintain, among other matters, positive net worth. There can be no assurance that our Company has, and will, at all times have, complied with all of the terms of the said financing documents. Any failure to comply with the financial or other covenants or obtain the consents necessary to take the actions may affect our business and operations. Further, any failure to service our Company's indebtedness and/or to comply with all of the terms of the said financing documents could have an adverse effect on the operations and/or profitability of our Company.

Our Company has received no objection for the Issue from DCB bank. However, our Company is yet to receive the no objection for the Issue from Further, our Company has also not received consent from, for naming them as lender to our Company. Failure or delay in obtaining the same would adversely impact the Issue.

- 19. *We take loans from Banks on frequently basis. If a substantial portion of these loans becomes non-performing, our business and financial performance could be affected.***

Our loan portfolio has, or may in the future, have a high concentration in certain customers or groups of customers. If due to bankruptcy, lack of liquidity, operational failure, and breach of contract, government or other regulatory intervention and other reasons including inability to adapt to changes in the macro business environment. It could be in future adversely affect our business and our financial performance.

II. *Risks Relating To Objects Of The Issue*

- 20. *The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds in the project is entirely at our discretion and as per the details mentioned in the section titled "Objects of the Issue" on page no. 67 . Any revision in the estimates may require us to reschedule our Project expenditure and may have a bearing on our expected revenues and earnings.***

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. Our estimates for the objects may exceed the value that would have been determined by third party appraisals and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the objects of the Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency.

- 21. *Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.***

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. Our inability to maintain sufficient cashflow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the section “Objects of Issue” on page 67 of this Draft Prospectus.

III. Risk related to this Issue and our Equity Shares

- 1. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 2. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company’s results of operations and financial performance;
- Performance of Company’s competitors,
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India’s economic and fiscal policies;
- Significant developments in India’s environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

- 3. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The Issue Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 71 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity

Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and

B. EXTERNAL RISK FACTORS

1. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

2. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

3. *Financial instability in Indian financial markets could adversely affect our company's results of operations and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

4. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

5. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

6. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

7. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

8. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operation as well as the price of the Equity Shares.

9. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (“STT”) is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

SECTION III- INTRODUCTION

SUMMARY OF OUR INDUSTRY

Overview of the Indian Economy

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. It is the fourth largest economy in the world in terms of purchasing power parity (PPP). According to IMF World Economic Outlook April, 2015, India ranks seventh globally in terms of GDP at current prices and is expected to grow at 7.5 per cent in 2016. India's economy has witnessed a significant economic growth in the recent past, growing by 7.3 per cent in 2015 as against 6.9 per cent in 2014. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices. The structural reforms are gaining momentum since the new administration took over in May 2014. Growth picked up in 2014, inflation markedly declined, and the external position was comfortable, helped by positive policies and lower global oil prices. The outlook for India is for economic strengthening through higher infrastructure spending, increased fiscal devolution to states, and continued reform to financial and monetary policy. The government underscored its intention to move steadily to tackle politically difficult structural issues that have stalled investment and limited economic performance in recent years.

Positive changes in key factors of Indian economy:

- India's Index of Industrial Production (IIP) grew by 4.1 per cent in April 2015 compared to 2.5 per cent in March 2015. The growth was largely due to the boost in manufacturing growth, which was 5.1 per cent in April compared to 2.8 per cent in the previous month.
- India's Consumer Price Index (CPI) inflation rate increased to 5.01 per cent in May 2015 compared to 4.87 per cent in the previous month. On the other hand, the Wholesale Price Index (WPI) inflation rate remained negative at 2.36 per cent for the seventh consecutive month in May 2015 as against negative 2.65 per cent in the previous month, led by low crude oil prices.
- India's consumer confidence continues to remain highest globally for the fourth quarter in a row, riding on positive economic environment and lower inflation. According to Nielsen's findings, India's consumer confidence score in the first quarter of 2015 increased by one point from the previous quarter (Q4 of 2014). With a score of 130 in the first quarter (2015), India's consumer confidence score is up by nine points from the corresponding period of the previous year (Q1 of 2014) when it stood at 121.
- India's current account deficit reduced sharply to US\$ 1.3 billion (0.2 per cent of GDP) in the first quarter of 2015 compared to US\$ 8.3 billion (1.6 per cent of GDP) in the previous quarter, indicating a shrink in the current account deficit by 84.3 per cent quarter-on-quarter basis.
- India's foreign exchange reserve stood at a record high of US\$ 354.28 billion in the week up to June 12, 2015 – indicating an increase of US\$ 1.57 billion compared to previous week.

Foreign Direct Investments in India/Government Initiatives

According to United Nations Conference on Trade and Development (UNCTAD) World Investment Report 2015, India acquired ninth slot in the top 10 countries attracting highest FDI in 2014 as compared to 15th position last year. The report also mentioned that the FDI inflows to India are likely to exhibit an upward trend in 2015 on account of economic recovery.

Owing to increased investor confidence, net Foreign Direct Investment (FDI) inflows touched a record high of US\$ 34.9 billion in 2015 compared to US\$ 21.6 billion in the previous fiscal year, according to a Nomura report. The report indicated that the net FDI inflows reached to 1.7 per cent of the GDP in 2015 from 1.1 per cent in the previous fiscal year. Numerous foreign companies are setting up their facilities in India on account of various government initiatives like **Make in India** and **Digital India**. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

According to Department of Industrial Policy and Promotion (DIPP), the total FDI inflows soared by 24.5 per cent to US\$ 44.9 billion during FY2015, as compared to US\$ 36.0 billion in FY2014. FDI into India through the Foreign Investment Promotion Board (FIPB) route shot up by 26 percent to US\$ 31.9 billion in the year FY2015 as against US\$ 25.3 billion in the previous year, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

During FY2015, India received the maximum FDI equity inflows from Mauritius at US\$ 9.03 billion, followed by Singapore (US\$ 6.74 billion), Netherlands (US\$ 3.43 billion), Japan (US\$ 2.08 billion) and the US (US\$ 1.82 billion). Healthy inflow of foreign investments into the country helped India's balance of payments (BoP) situation and stabilised the value of rupee.

Investments:

- Taiwan based Foxconn Technology Group, world's largest electronics manufacturer, will establish 10–12 facilities in India including data centres and factories by 2020.
- US based Bright SKY has planned to establish a plant in Naya Raipur India to manufacture 4G devices, Light Emitting Diode (LED) bulbs and telecom products. The proposed plan will require an investment of Rs 500 crore (US\$ 78.11 million) and would generate direct and indirect employment for over 600 citizens.

Consumer Durables Industry in India

India is expected to become the fifth largest consumer durables market in the world. By 2025 India would rise from the twelfth to the fifth largest position in the consumer durables market in the world; the market is expected to reach USD 12.5 billion by 2015.

India is one of the largest growing electronics market in the world. The consumer electronics market is expected to increase to US\$ 400 billion by 2020. The production is expected to reach US\$ 104 billion by 2016.

India has the world's third largest television industry. By 2018, the television industry in India is expected to expand to USD14.7 billion from USD8.0 billion in 2014.

Source: CEAMA, KPMG Report, Asian Development Bank, Aranca Research

The sector is expected to double at 14.7 per cent compound annual growth rate (CAGR) to US\$ 12.5 billion in FY15 from US\$ 6.3 billion in FY10. Urban markets account for the major share (65 per cent) of total revenues in the consumer durables sector in the country. Demand in urban markets is expected to increase for non-essential products such as LED TVs, laptops, split ACs and, beauty and wellness products. In rural markets, durables like refrigerators as well as consumer electronic goods are likely to witness growing demand in the coming years as the government plans to invest significantly in rural electrification.

OUR INDUSTRY

Industry Overview

Overview of the Indian Economy

India, a South Asian nation, is the seventh-largest country by area, the second-most populous country with over 1.25 billion people, and the most populous democracy in the world. It is the fourth largest economy in the world in terms of purchasing power parity (PPP). According to IMF World Economic Outlook April, 2015, India ranks seventh globally in terms of GDP at current prices and is expected to grow at 7.5 per cent in 2016. India's economy has witnessed a significant economic growth in the recent past, growing by 7.3 per cent in 2015 as against 6.9 per cent in 2014. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices. The structural reforms are gaining momentum since the new administration took over in May 2014. Growth picked up in 2014, inflation markedly declined, and the external position was comfortable, helped by positive policies and lower global oil prices. The outlook for India is for economic strengthening through higher infrastructure spending, increased fiscal devolution to states, and continued reform to financial and monetary policy. The government underscored its intention to move steadily to tackle politically difficult structural issues that have stalled investment and limited economic performance in recent years.

Positive changes in key factors of Indian economy:

- India's Index of Industrial Production (IIP) grew by 4.1 per cent in April 2015 compared to 2.5 per cent in March 2015. The growth was largely due to the boost in manufacturing growth, which was 5.1 per cent in April compared to 2.8 per cent in the previous month.
- India's Consumer Price Index (CPI) inflation rate increased to 5.01 per cent in May 2015 compared to 4.87 per cent in the previous month. On the other hand, the Wholesale Price Index (WPI) inflation rate remained negative at 2.36 per cent for the seventh consecutive month in May 2015 as against negative 2.65 per cent in the previous month, led by low crude oil prices.
- India's consumer confidence continues to remain highest globally for the fourth quarter in a row, riding on positive economic environment and lower inflation. According to Nielsen's findings, India's consumer confidence score in the first quarter of 2015 increased by one point from the previous quarter (Q4 of 2014). With a score of 130 in the first quarter (2015), India's consumer confidence score is up by nine points from the corresponding period of the previous year (Q1 of 2014) when it stood at 121.
- India's current account deficit reduced sharply to US\$ 1.3 billion (0.2 per cent of GDP) in the first quarter of 2015 compared to US\$ 8.3 billion (1.6 per cent of GDP) in the previous quarter, indicating a shrink in the current account deficit by 84.3 per cent quarter-on-quarter basis.
- India's foreign exchange reserve stood at a record high of US\$ 354.28 billion in the week up to June 12, 2015 – indicating an increase of US\$ 1.57 billion compared to previous week.

Foreign Direct Investments in India/Government Initiatives

According to United Nations Conference on Trade and Development (UNCTAD) World Investment Report 2015, India acquired ninth slot in the top 10 countries attracting highest FDI in 2014 as compared to 15th position last year. The report also mentioned that the FDI inflows to India are likely to exhibit an upward trend in 2015 on account of economic recovery.

Owing to increased investor confidence, net Foreign Direct Investment (FDI) inflows touched a record high of US\$ 34.9 billion in 2015 compared to US\$ 21.6 billion in the previous fiscal year, according to a Nomura report. The report indicated that the net FDI inflows reached to 1.7 per cent of the GDP in 2015 from 1.1 per cent in the previous fiscal year. Numerous foreign companies are setting up their facilities in India on account of various government initiatives like **Make in India** and **Digital India**. Mr. Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

According to Department of Industrial Policy and Promotion (DIPP), the total FDI inflows soared by 24.5 per cent to US\$ 44.9 billion during FY2015, as compared to US\$ 36.0 billion in FY2014. FDI into India through the Foreign Investment Promotion Board (FIPB) route shot up by 26 percent to US\$ 31.9 billion in the year FY2015 as against US\$ 25.3 billion in the previous year, indicating that government's effort to improve ease of doing business and relaxation in FDI norms is yielding results.

During FY2015, India received the maximum FDI equity inflows from Mauritius at US\$ 9.03 billion, followed by Singapore (US\$ 6.74 billion), Netherlands (US\$ 3.43 billion), Japan (US\$ 2.08 billion) and the US (US\$ 1.82 billion). Healthy inflow of foreign investments into the country helped India's balance of payments (BoP) situation and stabilised the value of rupee.

The Government of India has increased liberalisation which has favoured foreign direct investments (FDI). Also, policies such as National Electronics Mission and digitisation of television and setting up of Electronic Hardware Technology Parks (EHTPs) is expected to boost the growth of this sector. The consumer durables market is anticipated to expand at a CAGR of 14.8 per cent to US\$ 12.5 billion in FY15. - “Make in India” initiative to further strengthen the investments coming to India.

Distribution sector of Consumer durables

The manufacturers of these consumer durable goods face a lot of challenges in the Indian market due to dispersed population, infrastructure complexity, unorganized markets etc. These manufacturers can use the intermediaries like multi brand re-seller or retailers to reach out to the desired customers. The Distribution model should be as suited best for the region and segments. The right distribution model depends on the sophistication of the market.

Overseeing a large number of population is difficult but investing in the channel partners is crucial for competitive advantage. If a company wants to reach out to the maximum number of customers then they might want to take help of the intermediaries. These intermediaries would charge a small commission on the number of products they sell for the company. If the company wants to focus only on manufacturing then they might want to go for these retailers. Some big manufacturers like Sony, Samsung, Videocon, Whirlpool etc have their own retail outlets but they also have channel partners like Croma, E-zone, Vijay sales, etc selling their products for them in their own stores.

Consumers increasingly prefer organised retail stores in durables and electronics because they offer the entire range under one roof, convenience, good in-store service and so on. There is huge potential for consumer electronics retailing as retailers scale up. But times are changing. Consumers now can shop online as per their convenience any time of the day hence it is very important to move with the changing times. Retailers too now have their own online shopping websites for consumers to buy whatever they need from their home.

THE COMPANIES ACT, 1956

The Companies Act, 1956 deals with laws relating to companies and certain other associations. It was enacted by the parliament in 1956. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Act prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of companies. Regulation of the financial and management aspects constitutes the main focus of the Companies Act. In the functioning of the corporate sector, although freedom of companies is important, protection of the investors and shareholders, on whose funds they flourish, is equally important. The Companies Act plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

THE COMPANIES ACT, 2013

The Companies Act, 2013, has been introduced to replace the existing Companies Act, 1956 in a phased manner. The Ministry of Corporate Affairs has vide its notification dated September 12, 2013 and March 26, 2014 has notified 100 and 183 Sections of the Companies Act, 2013and the same are applicable from September 12, 2013 and

April 01, 2014, respectively. The Ministry of Corporate Affairs, in future, will also issue rules complementary to the Act establishing the procedure to be followed by companies in order to comply with the substantive provisions of the Act.

TRADEMARKS ACT, 1999

A trademark is used in relation to goods so as to indicate a connection in the course of trade between the goods and some person having the right as proprietor or user to use the mark. A mark may consist of a word or invented word, signature, device, letter, numeral, brand, heading, label, name written in a particular style and so forth. The Trademarks Act, 1999, (“Trademarks Act”), governs the registration, acquisition, transfer and infringement of trademarks and remedies available to a registered proprietor or user of a trademark. The registration of a trademark is valid for a period of 10 years but can be renewed in accordance with the specified procedure. Until recently, a person desirous of obtaining registration of his trademark in other countries has to make separate applications in different languages and disburse different fees in the respective countries. However, the Madrid Protocol, administered by the International Bureau of the World Intellectual Property Organization, (“WIPO”), of which India is a member country, aims to facilitate global registration of trade marks by enabling nationals of member countries to secure protection of trademarks by filing a single application with one fee and in one language in their country of origin. This in turn is transmitted to the other designated countries through the International Bureau of the WIPO. Accordingly, the Trademarks Act was amended vide the Trademarks (Amendment) Bill, 2009, to empower the Registrar of Trade Marks to deal with international applications originating from India as well as those received from the International Bureau and maintains a record of international registrations. It also removes the discretion of the Registrar to extend the time for filing notice of opposition of published applications and provides for a uniform time limit of four months in all cases. Further, it simplifies the law relating to transfer of ownership of trademarks by assignment or transmission and brings the law generally in line with international practice.

The Indian Income Tax Department is governed by CBDT and is part of the Department of Revenue under the Ministry of Finance, Govt. of India. Income tax is a key source of funds that the government uses to fund its activities and serve the public. The quantum of tax determined as per the statutory provisions is payable as: a) Advance Tax b) Self Assessment Tax c) Tax Deducted at Source (TDS) d) Tax Collected at Source (TCS) e) Tax on Regular Assessment.

The system of Value Added Tax (VAT) has been implemented, in the State of Maharashtra, w.e.f. 1st April, 2005. The VAT Act has addressed the problem of Cascading effect (double taxation) that were being levied under the hitherto system of sales tax. Under the current regime of VAT Hence VAT is a multipoint levy on each of the entities in the supply chain with the facility of set-off of input tax- that is the tax paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. THE EMPLOYEES PROVIDENT FUNDS AND MISCELLANEOUS PROVISIONS ACT, 1952 *(“Employees Provident Fund and Miscellaneous Provisions Act”)*

The Employees’ Provident Funds and Miscellaneous Provisions Act, 1952 is a social welfare legislation to provide for the institution of Provident Fund, Pension Fund and Deposit Linked Insurance Fund for employees working in factories and other establishments. The Act aims at providing social security and timely monetary assistance to industrial employees and their families when they are in distress.

The Act is administered by the Government of India through the Employees' Provident Fund Organisation (EPFO). The following three schemes have been framed under the Act by the Central Government:

- (a) The Employees’ Provident Fund Schemes, 1952;
- (b) The Employees’ Pension Scheme, 1995; and
- (c) The Employees’ Deposit-Linked Insurance Scheme; 1976.

The Central Government has been constituted Employees' Provident Funds Appellate Tribunal to exercise the powers and discharge the functions conferred on such by Employees’ Provident Funds and Miscellaneous Provisions Act, 1952.

EMPLOYEES STATE INSURANCE ACT, 1948

The promulgation of Employees' State Insurance Act, 1948(ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multidimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.
